

Position name: Staff Scientist

Department: Flow Cytometry unit, Life Sciences Core Facilities, Weizmann Institute of Science, ISRAEL.

Description: Lab work in the field of Flow Cytometry, including:

- Operating the equipment of cell analyzers and sorters, maintaining quality control for the instruments and supporting ongoing activity in the lab.
- Assisting and training users in operating the instruments and running samples.
- Giving scientific consultation including help in planning, performing and analyzing research projects.
- Updating on world-wide developments in instrumentation and technology and adapting them for the needs of local scientists.
- Developing new methods for measurements and analysis using the lab equipment.

Education and qualifications:

- Ph.D in Biology and/or scientific/engineering field.
- At least 2 years of lab experience following Ph.D - a requirement.
- Experience in Flow Cytometry - a requirement.
- Advantage for experience in computational biology/multi-parametric analysis.
- Advantage for experience in Immunology/cell biology.
- Experience in operating advanced technological systems and technical skills.
- Fluency in English (speaking and writing).
- Service awareness and high interpersonal communication skills.
- Ability to work independently and within a team.
- Responsibility, initiative, self-learning.
